## SUMMARY STATEMENT

---

As a Senior Software Engineer, I possess a wealth of professional development and deployment experience, having actively participated in application development across multiple domains, such as healthcare, education, and blockchain. I specialize in React, React Native and Typescript, imbibing the cutting edge of web technology. I am also well-versed in backend development using NestJS, PostgreSQL, and MongoDB. Especially adept at designing intuitive front-end and mobile applications well-integrated with third-party APIs, efficiently handling CI/CD, and publishing Android and iOS applications to their respective stores. In addition, I am proficient with backend technologies and can contribute to full-stack applications developed and fine-tuned for end-users with optimal speed and security.

## SKILLS

---

|                     |                                                                                                 |
|---------------------|-------------------------------------------------------------------------------------------------|
| <b>Tech stack</b>   | Typescript, Javascript, ReactJS, React Native, NextJS, NestJs, Swift, Objective C, Java, Python |
| <b>Database</b>     | PostgreSQL, MongoDB                                                                             |
| <b>Technologies</b> | REST APIs, JQuery, Bootstrap, Redux, Redux-Saga, Docker, AWS, Firebase                          |
| <b>Tool and IDE</b> | Git, VSCode, Figma, Sketch, XCode, Android Studio                                               |

## WORK EXPERIENCE

---

### Supercoder

January 2022 - December 2024

Senior Software Engineer

### Supercoder Developer | Supercoder

- **Project overview:** Developed a job search application aimed at helping developers worldwide find and apply for positions in Korean companies. The app connects talent with opportunities, providing a streamlined application process.
- **Main responsibilities:**
  - The critical member to be involved from the beginning.
  - Working as Senior Software Engineer.
  - Integrate with APIs and third-party.
  - Take requirements and research solutions to advise the PM.
  - Write a unit test with Jest.
  - Set up, managed, and deployed to Apple and Google Stores.
- **Tech stack:**
  - Expo, React Native, Typescript, Zustand, Firebase, i18n, Deeplink, ...
  - Figma, Jest

### Medit Link | Medit

- **Project overview:** Developed a communication platform for dental clinics and labs to manage client requirements and track the order process efficiently. The app facilitates

streamlined interactions between clinics and labs, ensuring order accuracy and timely updates.

- **Main responsibilities:**

- Working as Senior Software Engineer.
- The critical member to be involved from the beginning.
- Integrate with APIs and third-party.
- Write a unit test with Jest.
- Take requirements and research solutions to advise the PM.
- Write react native library to adopt the requirement.
- Write CI/CD pipeline with GitHub Actions.
- Implement Passkey to increase security.
- Set up, managed, and deployed to Apple and Google Stores.

- **Tech stack:**

- React Native, Typescript, Redux, Firebase, i18n, VOIP, Callkeep, Gifted Chat, Deeplink ...
- Twilio, Agora, Sentry, Datadog
- Fastlane, GitHub Actions
- Figma, Jest

### Connecting App | YPLabs

- **Project overview:** Developed and maintained a dating application that allows users to find and connect with others nearby. I upgraded and modernized the application to enhance its performance and user experience.

- **Main responsibilities:**

- Working as Senior Software Engineer.
- Upgrade the React native version to the latest.
- Maintain and refactor all the code according to the technical leader's new convention.
- Integrate with APIs and third-party.
- Write react native library to adopt the requirement.
- Write CI/CD pipeline with GitHub Actions.

- **Tech stack:**

- React Native, Typescript, Redux, Firebase, i18n, VOIP, Callkeep, OneSignal, Gifted Chat, Deeplink, ...
- Kakao, Agora, Line, Sentry, Amplitude, AppsFlyer, Codepush
- Fastlane, CircleCI, GitHub Actions
- Figma, Jest

### Careplus

*April 2021 - December 2021*

*Middle Full-Stack Developer*

### Careplus

- **Project overview:** Developed a comprehensive healthcare application that enabled patients to book appointments with doctors, access medical records, and order healthcare packages. Played a pivotal role in the project from inception to deployment, ensuring efficient functionality and scalability.
- **Main responsibilities:**

- Working as Senior Full-Stack developer.
- The critical member to be involved from the beginning.
- Design database structure and build codebase and CI/CD for Backend.
- Integrate with APIs and third-party.
- Testing features and management team members working correctly.
- Set up, managed, and deployed to Apple and Google Stores.
- **Tech stack:**
  - NestJS, React Native, Typescript, Redux, Firebase, Restful API, Deeplink, ...
  - PostgreSQL
  - Docker, Github Actions
  - Figma, Jest

### **S3Corp**

*December 2019 - March 2021*

#### *Front-End Developer*

- I am a level 2 Front-End developer on the Sovereign Degens, Neloverse, Site Manager, Concierge Portal, FanPass, and BoughtIO projects.
- I developed and integrated applications using ReactJS, Smart Contracts, Web3Js, and Redux, and I deployed and hosted them on Nginx, CDN, and Ubuntu servers.
- Engineered and deployed smart contracts for blockchain projects and handled post-audit fixes.
- Enhanced website performance, refactored code, and implemented new features using C#, MySQL, HTML, CSS, and JavaScript.
- Spearheaded the rollout and upgrade of apps on Apple and Google stores, integrating live streaming and push notifications.

### **ILA Viet Nam**

*June 2017 - November 2019*

#### *Mobile Developer*

#### **ILA Global Education**

- **Project overview:** Developed a mobile application to enable parents to monitor their children's learning progress at ILA, enhancing communication between the institution and parents through a user-friendly interface.
- **Main responsibilities:**
  - Design UI/UX.
  - Integrate with APIs.
  - Write a unit test with Jest.
  - Set up, managed, and deployed to Apple and Google Stores.
- **Tech stack:**
  - React Native, Javascript, Redux, Firebase
  - Google Map
  - Native base
  - Sketch, Jest

---

## **EDUCATION**

**Singapore Institute of Management (SIM)**  
*Diploma in Information Technology*

*April 2025 - March 2026*  
*GPA: 3.81*

**Ho Chi Minh University of Technology (HCMUT)**

*2014 - 2018*
